

„ TECHNOLOGY THAT SPRINGS – INNOVATION MADE OF WIRE“

WELCOME TO MJ SPRINGS LTD.

Technical springs with precision and strength. Innovative solutions for industry and technology:

Who we are:

MJ Springs Ltd. is a specialized manufacturer of technical springs with many years of experience in metalworking and precision engineering. Our products are used wherever load must be controlled and movement enabled.

Our values:

- ▶ Technical excellence
- ▶ Customer focus
- ▶ Sustainability & responsibility

COMPANY PROFILE

Our springs at a glance:

- Compression springs – for controlled force absorption
- Extension springs – for precise return
- Special springs – customized according to drawings or samples
- CNC-bent wire parts with the highest precision

Materials:

Stainless steel, spring steel, copper alloys, specialty materials

PRODUCT OVERVIEW

Our springs are used in:

- Mechanical and plant engineering
- Automotive industry
- Medical technology
- Defense industry
- Furniture and packaging technology
- Electrical engineering and sensor technology

INDUSTRIES & APPLICATIONS

Technology meets precision

- CNC-controlled manufacturing
- Automated testing processes
- ISO-certified quality assurance
- Prototype construction & series production
- Capacities: Small batches starting from 100 units to large batches of several million units

PRODUCTION & QUALITY

Your benefits with us:

- ✓ Customized solutions
- ✓ Fast delivery times
- ✓ Competitive terms
- ✓ Technical consulting & development
- ✓ Reliable partnership

ADVANTAGES

Let's get your idea moving together.
